

# Non-magnetic Specials

---

## Non-magnetic Chip Arrays

All parts in this catalog can be assembled as chip arrays.  
Consult the factory for more details

## Non-magnetic Ultra High Voltage Chip Capacitors

Most 38 Series chip capacitors can be manufactured  
as double wide for higher voltage applications.

# Additional Non-magnetic Catalogs

## Non-magnetic Hardware

A Non-Magnetic Machine Screws catalog is available from Voltronics Corporation. It highlights standard hardware in both English and Metric sizes. Prices are based on 1,000 and 10,000 piece orders. Voltronics Corporation will accept blanket orders based on your yearly usage. Special inserts and other related hardware are also available. All our Non-Magnetic Machine Screws are made with the same laboratory certified materials we use in our Non-Magnetic Trimmer Capacitors.

**Non-magnetic screws:**

Flat Head Screw

Pan Head Screw

**The only choice for non-magnetic machine screws**

**Every NMR and MRI Test Depends on Non-Magnetic Materials!**

Find these catalogs on the web at [www.VoltronicsCorp.com](http://www.VoltronicsCorp.com)

## Non-magnetic Trimmer Capacitors

As the world leader in non-magnetic multi-turn trimmer capacitors, Voltronics Corporation offers a wide variety of tuning solutions for the most sensitive MRI, NMR and spectroscopy applications. Available dielectric choices include air, PTFE, glass, quartz and sapphire with sealed construction and positive tuning stops. A wide variety of mounting configurations and extended shaft options assure compatibility with the most demanding applications. Virtually all of the Voltronics multi-turn trimmer capacitor product line can be ordered in non-magnetic versions by including the prefix "NM" in the standard part number. Cryogenic versions of these parts are also available. Consult the factory for more details.

**Non-magnetic trimmer capacitors:**

**The first choice for NMR and MRI probes**

**Every NMR and MRI Test Depends on One Moveable Part!**
